The Africa Research In Sustainable Intensification for the Next Generation (Africa RISING) program comprises three research-in-development projects supported by the United States Agency for International Development as part of the US Government's Feed the Future initiative.

Through action research and development partnerships, Africa RISING will create opportunities for smallholder farm households to move out of hunger and poverty through sustainably intensified farming systems that improve food, nutrition, and income security, particularly for women and children, and conserve or enhance the natural resource base.

The three regional projects are led by the International Institute of Tropical Agriculture (in West Africa and East and Southern Africa) and the International Livestock Research Institute (in the Ethiopian Highlands). The International Food Policy Research Institute leads the program's monitoring, evaluation and impact assessment. <http://africa-rising.net/>

**MALIMARK:** Mali Agricultural Market Trust

**PGDTE:** Projet de Gestion Durable des Terres et des Eaux

**TAAT :** Technologies for African Agriculture Transformation

**UNDP:** United Nation Development Program

**World Veg:** World Vegetable Center

## **Introduction:**

Africa RISING is a regional research for development program funded by USAID through Feed the Future (FtF) initiative in Mali and Ghana. The Mali component is lead by ICRISAT has initiated the farmer field days since 2016 in the technology parks installed in the districts of Bougouni and Koutiala to showcase promising technologies and innovations developed by research teams for sustainable mixed intensification farming systems in Soudan Guinean zones of Mali.

The 2018 Africa RISING Farmers' Field Day was organized by ICRISAT and project partners: AMEDD, FENABE, IER, World Veg with the participation of projects and NGOs such as ARDT-SMS, PGDTE , TAAT, EUCORD, MALIMARK and CMDT.

Several high ranking officials participated the 2018 farmers field day along with researchers, extensions agents and invited students. In Bougouni the district governor, the regional director of forestry of Sikasso, the presidents of the district council of Bougouni attended the event. and the students of the institute of agricultural training of Bougouni. In Koutiala the field day was honored by the district governor and the Mayor of M'Pessoba. The director of M'Pessoba Agriculture Training Center (C.A.A) and students from Segou University, institute of agriculture training in Bougouni, Polytechnic Institute of Malick Sidibe of Koutiala and their lecturers attended the field days. The schedule of the visit along with list of participants and their contact address is provided in annex 1 and 2.

## **Bougouni District Farmer Field Day**

The farmer field day of Bougouni took place on October 17<sup>th</sup> 2018 at 11h00 in the Technology Park of Madina located at 20 km from Bougouni town. The field day was organized and facilitated by AMEDD and FENABE. A total of 300 persons participated the event (AR Farmers: 50, Students: 50, PGDTE farmers: 50, ARDT partner farmers: 75, Extension Worker: 25). The field day in Madina started at 11h30 by the welcoming word of FENABE and the village chief of Madina.

*Launching of Farmers' Field Day in Bougouni*

These interventions were followed by the welcoming remarks of the mayor of Kouroulamini, the intervention of the president of the district council of Bougouni and the project coordinator who encouraged farmers' to take advantage of these field day visits and congratulated participants for their presence at the event. The field day was launched officially by the governor of Bougouni who thanked the researchers for their engagements to develop Malian Agriculture and improve farmers' livelihoods in the region of Sikasso.

### **Visiting Technologies:**

After the official launching of the field day participants proceeded to a guided tour. The first demonstration was validated technology on dual purpose sorghum variety plots (soubatimi, tiandougoucoura and tieble) and soil fertility management trials with cow manure, mineral fertilizer, and poultry manure on three sorghum varieties (soumba, Pablo and Tieble)

*A-Visit of double purpose sorghum. B- Split plot trials in Madina TP*

A key moment of the guided tour was the visit of good practices of sustainable land water management demonstration plots: CBT, Intercropping (Maize and Cowpea) and

Microdising installed by the *Projet de Gestion Durable des Terres et des Eaux* funded by UNDP in partnership with ICRISAT and FENABE

*A-Demonstration of good practices of PGDTE-UNDP. B-Demonstration of Chopper*

This was followed by a quick demonstration of chopping machine which is used to chop sorghum stems into more digestive animal feed.

Participants proceeded then to visit the improved vegetable cultivars trials conducted under the lead of the World Vegetable center.

After the visit of the demonstrations, the discussions started and research teams were asked questions related to:

- Who is organizing the field days? How to sustain the organization of the field day?
- Why dual purpose sorghums are attacked by birds and anthracnose disease?
- Are these attacks natural or caused by something artificial?
- Is poultry manure accessible in quantity and quality to farmers?
- How do they use poultry manure?
- Do farmers' use cow manure and chemical fertilizer at the same time?

The discussion session was followed by testimonials of farmers regarding the technologies presented during the field day.

**Fousseini Samake:** A 45-year-old farmer and seed producer in Flola village reported that he currently provides dual purpose sorghum seeds to his fellow farmers' from surrounding villages. In 2018 the seed of *Soubatimi* he distributed freely to other farmers' cover nearly 4 hectares.

*Fousseini Samake; Farmer in Flola Bougouni.*

Farmers appreciated soubatimi because it is more digestive and the meal have a good taste

and be conserved longer. This sorghum variety yield higher than the local variety and the stems are more palatable to animals.

After lunch the visitors headed to visit demonstration sites of EUCORD who is a partner of ARDT-SMS in Madina and Flaboula where participants discovered how farmers' are producing hybrid sorghum variety seeds (Pablo) and improved soil fertility management practices.

### **Koutiala Site Farmers Field Day**

In Koutiala district the farmers field day took place on October 18 2018 at the technology park of M'Pessoba which is located 47 km from Koutiala. The field day was organized by AMEDD and co-chaired by the district governor and the Mayor of M'Pessoba. More than 300 guests comprising farmers' students, extension workers' and researchers attended the field day. The guest of honors were the visiting students of Segou University and the Polytechnic Institute of Koutiala. After the welcoming word of the facilitator the chief regional scientist of Africa RISING thanked farmers, extension workers and students for their participation to this key event.

After these words, the governor of Koutiala made a welcoming remark and highlighted the importance of technology dissemination under climate change and overall agriculture development in Mali.

*A- Speech of the Prefect of M'Pessoba. B-Interventions of Dr F. Kisito at FFD launching in M'Pessoba*

After the speech of introduction, the facilitator announced the program of the day and shared the participants between different groups to increase the participation and interactions levels between scientists and participants of the field day.

### Visiting technologies:

The visit of technologies started after the speech and welcome words of the administrative authorities and each technology was presented by field technicians.

*A-Visit of vegetable Trials. B-Visit of dual purpose sorghum in M'Pessoba*

The vegetable trials and the dual purpose sorghum were among the demonstrations presented to visitors by technicians backed by lead researchers.

**A**-Visits of soyabean demonstration; **B**-Visit of mucuna demonstration in M'pessoba TP

Key moment of the field day was the visit of the demonstration of fodder technology (*mucuna pruriens*) disseminated by project TAAT demonstrations showcased by ILRI and AMEDD.

After the visit of demonstrations, general discussions were held where participants' questions' were answered by research teams. The questions discussed were related to:

- How to get access to the seeds of dual purpose sorghum varieties?
- What is the potential yield per hectare of dual purpose sorghum?
- How and where to install a split plot trial?
- What are differences between dual purpose sorghum and other sorghum varieties?
- How to access bracharia seeds? What is the potential yield per hectare of bracharia?
- What is the importance of intercropping soya been and sorghum?

After discussions and lunch, visitors headed to the village of Sirakele to visit vegetable home gardens trials installed by the World Vegetable center to improve food security and allow landless women to grow vegetables and diversify food sources for their households.

*Visits of home garden demonstration in Sirakele-Koutiala*

After visiting the home gardens, the visitors participated to a demonstration of how to prepare nutritious food for children and pregnant women.

*Demonstration of nutritious food preparation using local crop and livestock by-products in Sirakele*

Using cereals and local ingredients, women of Sirakele; supported by the World Vegetable center technicians; demonstrated how to prepare nutritious food. The recipes of the meal was a mixture of sorghum, cowpea, groundnut and milk. Women participating to these nutrition activities acknowledged the importance of these training to improve households' nutrition status by reducing malnutrition among children and pregnant woman using home grown crops and livestock by-products.

The field day was recorded by Radio Jamana Koutiala and Radio Yèrèdo M'Pessoba and broadcasted twice by these radios. Copies of these radio documents were provided to AMEDD.

## Annex 1 Africa RISING Phase II West Africa Project Farmers Field Day October 17-18 in Bougouni and Koutiala Mali

### Objective:

- Participation in Africa RISING Farmers Field Day and interact with farmers, extension agents and researchers
- Evaluation of agronomic activities in the technology parks of Bougouni and Koutiala
